

An Introduction to The Care Aims Intended Outcomes Framework

This **1-day workshop** aims to introduce you to the Care Aims Intended Outcomes Framework in order to help you understand how it could support service transformation and so that you can make a decision about whether to proceed to implementation within your service/team/organisation.

The Care Aims Model has been adopted by a large number of services across the UK to support them in transforming their services to being more ethical, effective and efficient through person-centred care and clarity about duty and effectiveness.

Please note: This workshop does not equip services/teams/organizations to implement the model locally. More in-depth training is required for this.

By the end of the workshop participants will have:

- a clear understanding of the concepts and principles underpinning the Care Aims Framework
- a clear understanding of how this approach applies to their service/caseload/client group

WORKSHOP OUTLINE: This workshop includes mainly taught elements and one opportunity for group work. Broad areas covered include:

- An overview of the Framework - its philosophy, origins and underlying principles
- The key benefits and impacts of using the framework to transform services
- The principles of collaborative, supported self-help and early intervention
- The principles of care management using care aims and episodes to measure intended outcome of intervention and demonstrate effectiveness
- Using care aims as a data set to support reflection, governance and organisational intelligence

THIS WORKSHOP IS SUITABLE FOR:

- Practitioners in Health, Social Care or Education, in the public or private sector, wishing to understand more about the Care Aims Framework.
- Any leader or commissioner of public or private sector services interested in a model which will support effective service transformation and excellent outcomes for the public.

FACILITIES: These should be provided by the service/organisation commissioning the package and, for each workshop, should include:

- a large room (cabaret seating or big enough for break-out groups for up to 90 people)
- a data/powerpoint projector, screen and flipchart
- refreshments as appropriate
- photocopying of handouts

COSTS: (Fee covers 1 day's tuition)

For up to 30 participants (optimum)

£1,450 + £290 VAT = **£1,740** plus travel/accommodation expenses at cost plus VAT

For up to 100 participants

£1,700 + £340 VAT = **£2,040** plus travel/accommodation expenses at cost plus VAT
